"At each stage in the process, ask the question 'why' five times."
---Taiichi Ohno (1912-1990)

Integration
Integration describes the processes required to ensure that the various elements of the project are coordinated.

Scope
Scope describes the processes required to ensure that the project includes all the work required, and only the work required, to complete the project successfully.

Time
Time describes the processes required to ensure the timely completion of the project.

Cost
Cost describes the processes required to ensure that the project is completed within the approved budget.

Quality
Quality describes the processes required to ensure that the project will satisfy the needs for which it was undertaken.

Human Resources
Human Resources describes the processes required to make the most effective use of the people involved in the project.

Communications
Communications describes the processes required to ensure timely and appropriate generation, collection, dissemination, storages, and ultimate disposition of project information.

Risk
Risk describes the processes concerned with identifying, analyzing, and responding to project risk.

Procurement
Procurement describes the processes required to acquire goods and services from outside the performing organization.
